

Remarks

Applicants submit this paper and request entry of the amendments herein. Claims 1-4 are currently pending in the application. Claims 1-3 are cancelled with this amendment.

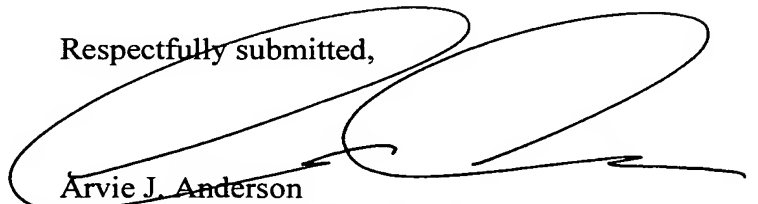

The Specification has been amended to introduce a reference to the provisional patent application from which the present application claims the benefit of priority.

Claim 4 has been amended to more particularly claim the invention, correct the inadvertent spelling error of the word "one" as well as to properly claim the invention in U.S. PTO format. Support for the revised claim may be found in, at the least, the Examples.

New Claims 5-7 are added to properly claim the invention in U.S. PTO format. Support for the new claims can be found in the claims as originally filed, and in the Examples. Thus, no new matter is added.

Applicants respectfully request prompt consideration and allowance of the claimed subject matter. If a telephone interview would be of assistance in advancing prosecution of the subject application, Applicants' undersigned attorney invites the Examiner to telephone him at the number provided.

Respectfully submitted,
